Literal Word2Vec validation of the turnover prediction
A Literal retention exposure
B Fixed five epochs
C Retained-center budget matched
D External peak check
expected retained center tokens
raw center-vector norm
degree at peak norm
degree
subsampling threshold t
$t = 3e-04$
$t = 1e-03$
$t = 3e-03$
$t = 3e-04$ (8 epochs)
$t = 1e-03$ (6 epochs)
$t = 3e-03$ (5 epochs)
fixed epochs
budget matched
exploratory controlled fit
