Identical training through epoch 5; late rate 0.0001 vs 0.0025
Five graphs; means ± graph SE; faint lines show every graph
A Raw norms
Shared state at epoch 5
Floor, epoch 20
Reheat, epoch 20
0.0025 from start, epoch 20 (PR36)
Raw norm
Degree (geometric bin mean)
B Balanced norms
Balanced norm
Degree (geometric bin mean)
C Upper-degree change in balanced norm
Highest bin minus preceding bin
Absolute training epoch
D Idealized expected-loss diagnostic
Expected loss per positive pair
Absolute training epoch
